

Hadil Souaci

AI & Web Developer | Programming Instructor

Algeria | hadilsouaci2@gmail.com

Profile

Dedicated computer science professional with a strong foundation in Artificial Intelligence and frontend web development. Combines technical expertise in building intelligent applications with a practical background in designing and delivering engaging coding, robotics, and cybersecurity curricula for children.

Skills

- **Web Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Design, CSS Animations.
- **AI & Data Science:** Python, OpenCV, PyTorch, Deep Learning, Computer Vision, 2D to 3D Reconstruction.
- **Tools & Platforms:** Git, GitHub, VS Code, Arduino, Tinkercad, Gamified Learning Tools.
- **Instruction:** Curriculum Development, STEM Education, Interactive Learning, Technical Tutoring.

Projects

2D to 3D AI Reconstruction System

- Developed a deep learning model focused on depth estimation to convert standard 2D images into interactive 3D models.
- Conducted comprehensive research on computer vision frameworks and optimized model performance for academic evaluation.

Interactive Web Portfolio

- Designed and engineered a modern, responsive personal portfolio website using React.js and advanced CSS.
- Implemented a dark theme interface with interactive elements and optimized performance for recruitment review.

Educational Technology & Cybersecurity Courseware

- Designed an introductory computer basics and networking syllabus tailored for students aged 9–12.
- Built a gamified cybersecurity curriculum focusing on online safety, threat detection, and strong password habits.

Experience

Freelance Programming & STEM Instructor

2025 – Present

- Conducted virtual robotics and electronics lessons for kids, guiding students through practical hands-on projects using Arduino, sensors, and breadboards.
- Taught core IT, block-based coding, and foundational programming concepts using interactive and game-based learning methodologies.

Academic AI & Web Development Projects

2024 – 2026

- Built and managed full-cycle technical projects from conceptual research to implementation, specializing in React frontends and Python-based AI models.

Education

Master's Degree in Artificial Intelligence

Academic Focus: Deep Learning, Computer Vision, and Advanced Algorithmic Systems

Bachelor's Degree in Computer Science

Core Foundations: Software Engineering, Data Structures, and Database Management
